

Power Outage

Power Outage – Emergency Notification Method: CUNY Alert, Building Announcement

A loss of electrical power may impact lighting, loss of telephones, loss of power for all equipment, elevators and IT systems, heat & air conditioning. The loss of electrical power can be local or regional and can be limited to a particular floor, building, or neighborhood.

WHEN REPORTING A POWER OUTAGE:

- Provide location of incident.
- Report any noises or occurrences that happened before the incident.
- NEVER touch electrical lines or exposed electrical wiring.
- Keep a flashlight handy. A flashlight app on a cell phone is good to have ready for activation.
- Know how to locate the nearest exit. Emergency lighting in hallways and stairwells will assist with this.
- If a hazard exists or there will be a prolonged disruption of power, evacuation may be initiated by the college administration or the building management team.
- Announcements regarding building closures will be made as deemed necessary by campus officials.

Follow up Communications: Bull Horn Announcement, College email, and/or CUNY Alert
